Description

Connectors of PR type are intended for use in DC and AC (frequency up to 3 MHz) electrical circuits with voltage up to 850 V (as peak)

The connectors are produced in two modifications: Plugs and Receptacles

The connectors are manufactured:

- Receptacles with backshell (straight shielding, straight non-shielding, elbow shielding, elbow non-shielding) or without backshells
- Plugs with backshell (straight shielding, straight non-shielding, elbow shielding, elbow non-shielding)

Plugs are delivered with rubber tube or without them

The connectors have threaded coupling.

Contacts:

- Ø 1,5 mm; Ø 2,5 mm; Ø 3,5 mm – non removable
- Ø 5,5 mm; Ø 9,0 mm – removable

Contact plating: silver

The connectors are manufactured in all climatic conditions in accordance with the technical conditions GEO.364.120TU
